

SETTING UP THE APPLICATION ENVIRONMENT

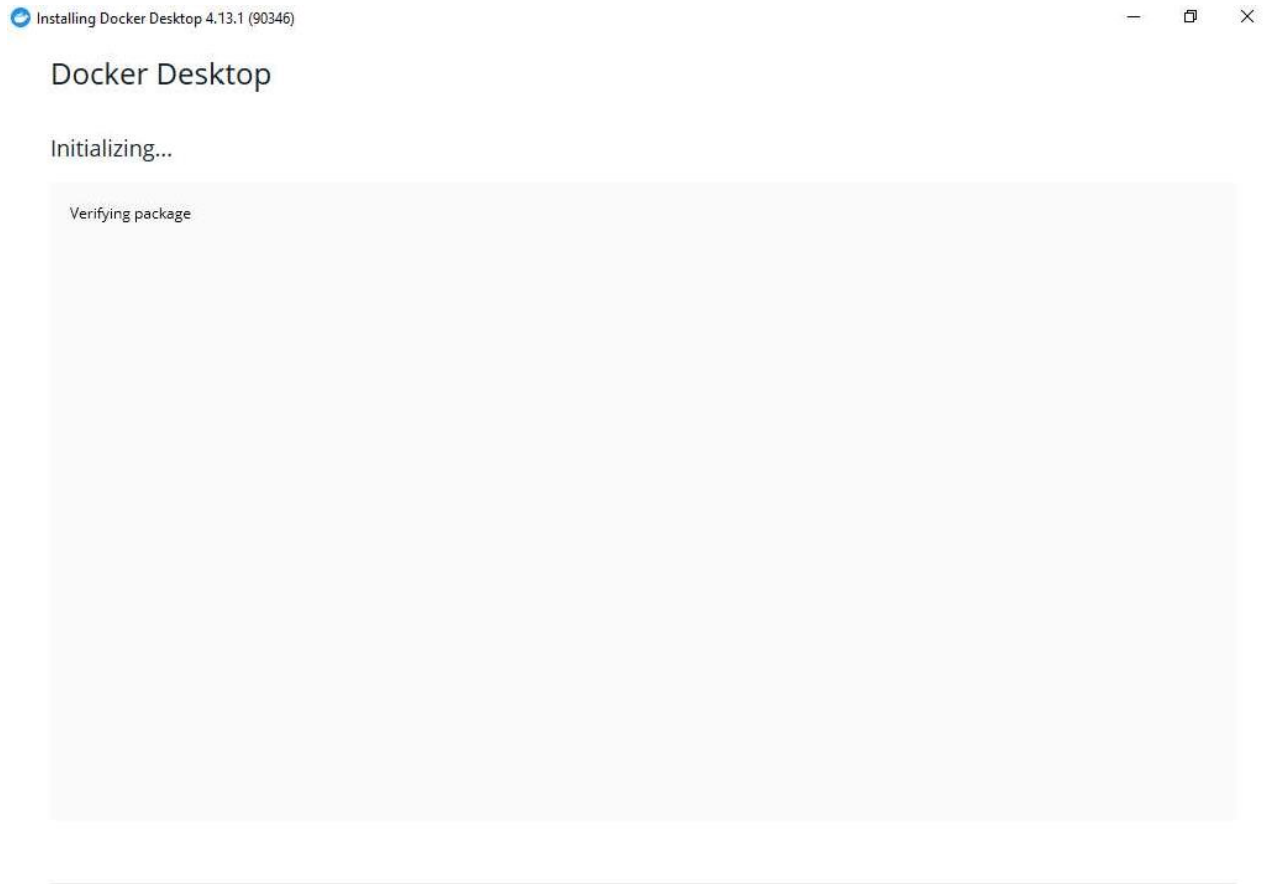

Docker CLI Installation

Date	11November 2022
Team ID	PNT2022TMID08671
Project Name	Inventory Management System For Retailer

Docker CLI Installation: commands

```
>> start /w "" "Docker Desktop Installer.exe" install
```

Docker desktop initializing:

Docker CLI installation

```
Command Prompt
Microsoft Windows [Version 10.0.22000.675]
(c) Microsoft Corporation. All rights reserved.

C:\Users\venga>docker --version
Docker version 20.10.17, build 100c701

C:\Users\venga>docker

Usage: docker [OPTIONS] COMMAND

A self-sufficient runtime for containers

Options:
  -c, --config string      Location of client config files (default
                           "C:\\Users\\venga\\.docker")
  -c, --context string     Name of the context to use to connect to the
                           daemon (overrides DOCKER_HOST env var and
                           default context set with "docker context use")
  -D, --debug              Enable debug mode
  -H, --host list          Daemon socket(s) to connect to
  -l, --log-level string   Set the logging level
                           ("debug"|"info"|"warn"|"error"|"fatal")
                           (default "info")
  --tls                    Use TLS; implied by --tlsverify
  --tlscacert string       Trust certs signed only by this CA (default
                           "C:\\Users\\venga\\.docker\\ca.pem")
  --tlscert string         Path to TLS certificate file (default
                           "C:\\Users\\venga\\.docker\\cert.pem")
  --tlskey string          Path to TLS key file (default
                           "C:\\Users\\venga\\.docker\\key.pem")
  --tlsverify              Use TLS and verify the remote
  -v, --version            Print version information and quit

Management Commands:
  builder      Manage builds
  buildx*     Docker Buildx (Docker Inc., v0.9.1)
  compose*    Docker Compose (Docker Inc., v2.10.2)
```

Docker desktop:
